

Hybrid Red Grain Sorghum / Full Season

Product Profile

This combination is a medium-full cycle maturity hybrid. It tends to be slightly taller than other traditional hybrids but it has exceptionally high yield potential.

- The hybrid is single culm under most environments
- Large stem
- Large disease free leaves
- Standability is excellent. Leaves are large and semi-erect prior to anthesis

The panicle is awnless, semi-compact, and may sometimes be dry at maturity. Seeds are very large, round, vitreous, and red translucent. The grain is very attractive. Necrotic plant color is red. This hybrid is especially adapted to tropical environmental conditions. It has a very high level of foliar disease resistance. Yield potential of this combination is very impressive across a very wide array of environmental situations.

Plant Characteristics

Grain Color	Plant Color	Standability	Plant Height	Panicle Type	Head Exertion	Threshability	Grain Color Planted	
Red	Red	5	50-60 (in)	SC	3	4	Red
